

AUTOMATIC EMPTYING SYSTEM FOR PULPS AND CONCENTRATES

Vacbid® is the ideal equipment for adding liquid ingredients in mixing rooms. It is suitable for the production of juices, soft drinks, or any product requiring quick and efficient emptying with minimal operator intervention.

APPLICATION

The machine is designed for emptying a wide range of products and container formats.

Products: **1-10,000 cP**

Formats: **Jerrycans, drums, IBCs**

TECHNICAL DATA

PERFORMANCE

Reference times (seconds)

Handling	15
Emptying	60 - 240
Rinsing	45 - 90
TOTAL(S)	120 - 345*

Average capacity:

Kg/h | 2,295 - 6,600

*From drum 200 L 1,000 - 5,000 cP

CONSUMPTION

Electricity: 7.5 - 15 kw

Compressed air 0.2 - 0.5 Nm³/h

DESIGN

CE Marking for food industry
Compliance with EHEDG & 3A
ATEX version available

HIGHLIGHTS

Different configuration designs are available to meet our customers' specific needs regarding automation level, extraction capacity, or functionality.

- ✓ Easy handling
- ✓ Self rinsing
- ✓ Minimal product waste
- ✓ Ultra clean extraction
- ✓ High performance
- ✓ Semi-automatic operation
- ✓ Accurate dosage
- ✓ Weight control available
